### **EXAMINER'S AMENDMENT**

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Gail Dalickas on September 26, 2005.

The application has been amended as follows:

Claims 16 and 17 have been cancelled.

### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance:

Claims 16 and 17 were cancelled to allow claims 1-7, 9-15 to be allowed. As noted in the previous action, claims 16 and 17 are product-by-process claims and no difference can be seen between the product of Otterstedt et al. (US 5,863,516) and claims 16 and 17. Otterstedt et al. discloses particles that are, e.g., 120 nm with a geometric standard deviation of less than 1.20. See Example 2, and the abstract. The examiner calculates that a geometric standard deviation of 1.20 converts to 95% of the particles being between  $\pm 10.5$  nm of the mean. Thus, the particle sizes of the reference fall within the distribution recited in claim 16.

Claims 1-7 and 9-15 are allowable for the reasons provided in the previous Office action.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue
